

Module 5

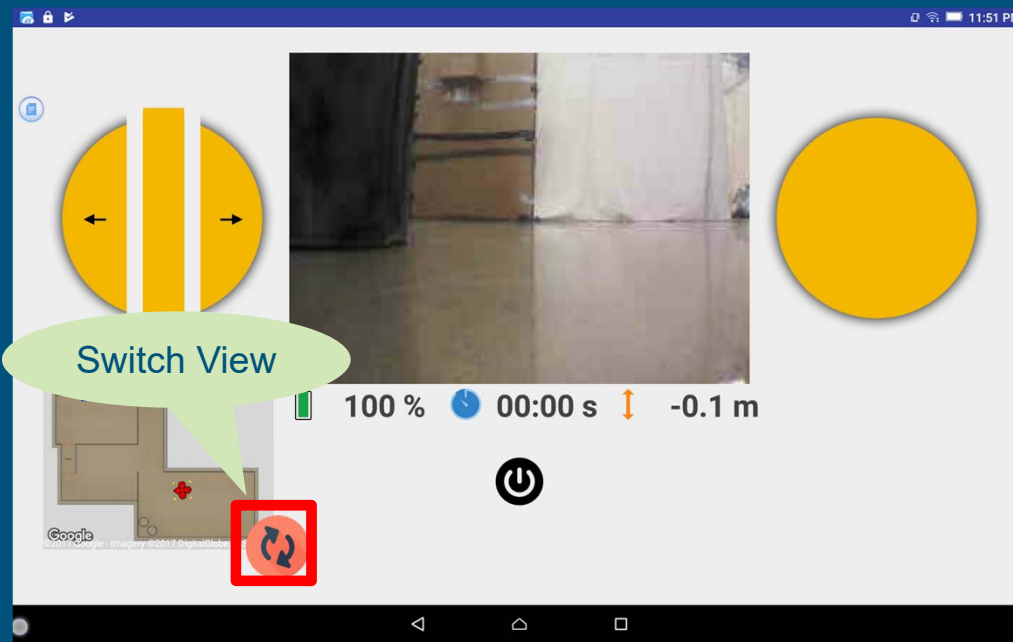

Camera Operation

Manual Control App – Camera on Drone

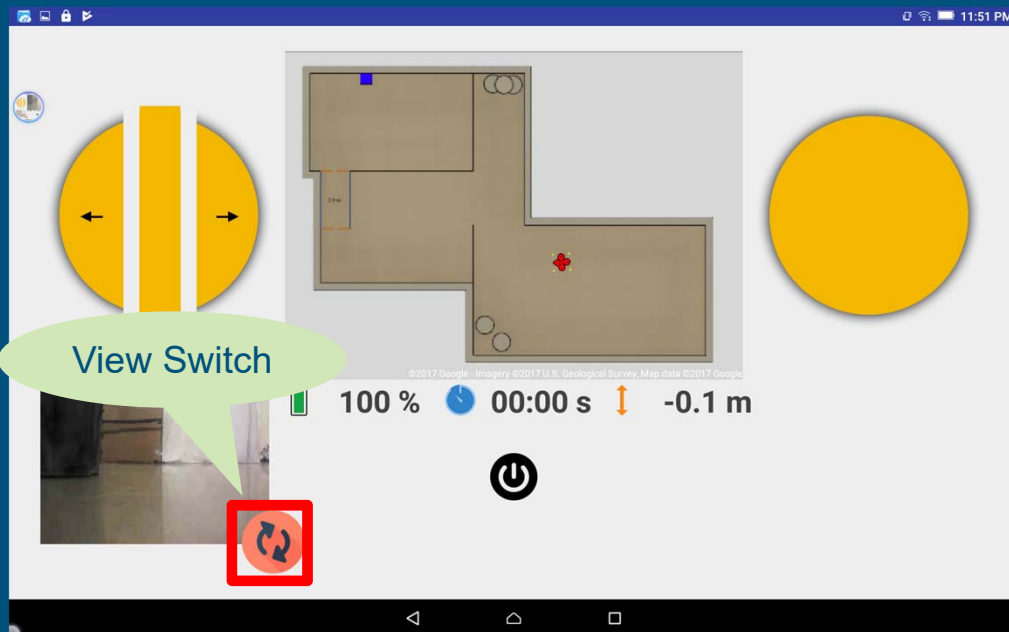

- There is a camera installed on the front of the drone, and the video stream is visible through the video feed.
- While navigating, it is highly recommended to consistently monitor the camera for obstacles using the video feed.

Manual Control App – Camera Operation

- You can switch between the video feed window and map window by pressing the switch view button.
- It will reduce the size of the video feed window and move the window to the left down corner.

Manual Control App – Camera Operation

- Pressing the view switch button once more will swap the 2 windows back again.
- It will increase the size of the video feed window again.

Manual Control App – Camera Operation (Video)

Congratulations !
